14. ABSTRACT Purpose: Combat and operational stress is the anticipated reaction of service members who have been exposed to stressful events. Reactions vary, but are usually emotional, intellectual, physical and/or behavioral in nature. Service members experiencing operational stress occasionally require in-theater care. This webinar will identify best practices for understanding and treating combat and operational stress, with special emphasis on in-theater care. Speakers will provide suggestions and techniques for care providers as well as for service members experiencing operational stress.
